

**SUMMER 2019  
NEVER STOP  
LEARNING**

WITH STATE STANDARD ALIGNED CURRICULUM.

**JEI Learning Center®**

**Never Stop Learning**

According to Brookings, students lose an average of one month of school learning over the summer with the sharpest declines in math. At JEI we're fighting summer learning loss with five programs designed to help students learn at their own pace. With the help of our qualified instructors, students can prevent the summer slide with achievement programs in math and English. For advanced students, our enrichment programs in reading & writing and problem solving will help them start the new school year ahead of their peers. Our newest Brain Safari program further develops students' critical thinking skills that they can apply to all domains of their education. Enroll with JEI to give your child an academic advantage.

Contact your local JEI Learning Center and learn more about summer programs near you today!

**National Teacher Appreciation Week Spotlight**

**From Student to Educator, Director Amy Ko Talks Teacher Appreciation**

Director Amy Ko of the JEI Learning Center of Merrick, New York was once herself a student of the JEI Self-Learning Method from second grade up to freshman year of high

school, the final grade for which we offer programs. However, that was not to be the end of her involvement in the JEI community.

Read more about Amy's experience as a JEI student and her journey to becoming an Instructor & Director!

**Must-Have Skill for Children #1: Reading a Road Map**  
In today's digital age, does your child know how to read a road map? What may be considered a dying skill in this digital age, is still an extremely important skill worth having. [Find out about how this skill assists children with following instructions, figuring out directions, and learning distances](#)

**Stop Asking "What Do You Want to Be When You Grow Up?"**  
As an adult, you need to provide children with room to grow and time for them to make the right decisions for themselves. Asking, "What do you want to be when you grow up?" is not the right way to do it—save that for high school at the earliest! [Find out how you can encourage professional growth in your children at JEI.](#)

**Growth vs. Fixed Mindset: Fostering Your Child's Growth Mindset**  
The "growth mindset" does not bow to defeat—it inspires a karate chop to the face of failure. By praising the right thing, practicing constructive criticism, focusing on processes, putting your child first, and being the example, you can help your child grow fond of working hard and putting her/his limits to the test. [Read more about the benefits of growth mindset.](#)

**Vocational Training or Higher Ed: The Washington-DuBois Debate**  
Echoes of this debate can still be heard today as policymakers debate over whether liberal-arts education or vocational training is the key to bringing low-income Americans into the middle class. Our approach at JEI embraces hands-on learning, encouraging our students to connect their academic pursuits to their practical application. [Read more about this hot topic.](#)

**Entrepreneur**

**The Top 100 Franchises for Less Than \$100,000 in 2019**
